I. Introduction

Ever since the beginning of time, we have looked up and wondered. We have felt the need to understand the world around us and our place within it...to understand who we are and how to create the best possible life that we can. In the beginning, astronomy and astrology were merged. It wasn't until the 18th century that the lines between astronomy and astrology were formed and they became two distinct disciplines. Astronomy is the scientific study of the universe beyond Earth...the movement of the stars and planets within our solar system. Astrology applies meaning to the relationships between the planets, stars, and us here on Earth.

(Sumerian Tablet ~ circa 4000 B.C.)

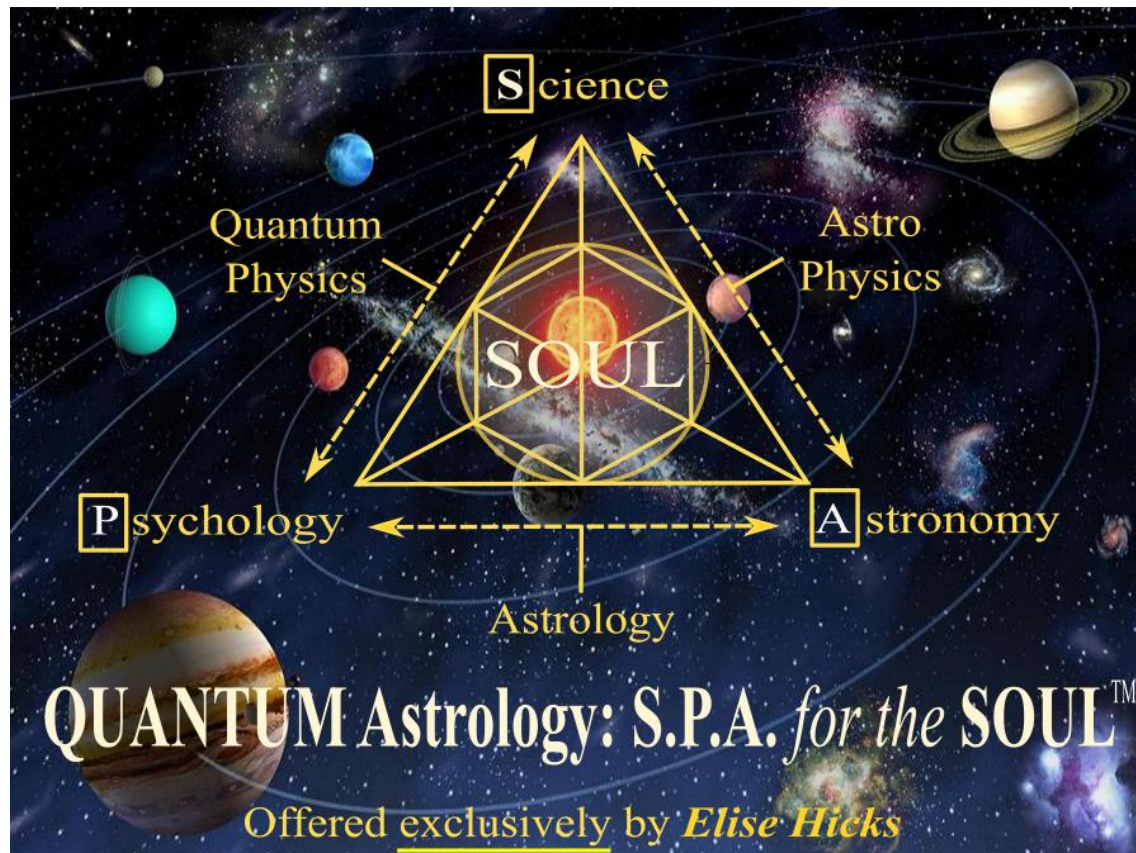

At the moment of our birth, we are infused with the energies of the cosmos. A natal chart is the map of the heavens, a snapshot so to speak of that moment of our first breath. There is much to discover from the patterns that we find in our birth chart.

Our birth chart is like a special software program that is custom designed to give our soul exactly the quality of experience that it wants to have for this lifetime. This means that we will have challenges, which from our personality's point of view we may not prefer, but from our soul's perspective, these challenges are exactly what we need for further growth along the evolutionary path. That being said, we also have free will and can choose how we express and thus experience the various aspects and traits, which are individual to us.

II. Quantum Astrology – S.P.A. *for the SOUL*™

Quantum Astrology is the point where Science, Psychology, and Astronomy merge...and this point is your Soul. This is why I call what I do “S.P.A. *for the Soul*™.” You can go to a spa for your body, so I wanted to offer a service that feeds your soul.

Your soul is the trinity of the quantum field, your mind, and the universe. The quantum field is what science is now proving—that everything is energy, comes from and returns to energy, and is influenced by our consciousness; but we also have our mind—the result of our natural and social environment; and we are all interconnected in this universe—created and affected by specific mathematics and physical laws.

S.P.A. for the Soul™ creates a transformational experience in which my clients are empowered to co-create the best possible life experience, through awareness of the active energies that are present in the birth chart and that are emerging through progressions and transits while partnering with the archetypal principles to form an elevated experience and mastery.

We have our charts; our charts do not have us!

QUANTUM ASTROLOGY - A Compass for the SOUL

ASTROLOGY SIGNS & HOUSES =
Quantum Field "Space" + Gravity + Spin + Sun Location

The signs follow a "Fibonacci series": a series of numbers in which each number is the sum of the two preceding numbers. The simplest is the series 1, 1, 2, 3, 5, 8, etc.

The signs also follow the "Golden Ratio/Mean" or "Phi" (1.61803398875): two quantities are in the golden ratio if their ratio is the same as the ratio of their sum to the larger of the two quantities
