I. Introduction

Ever since the beginning of time, we have looked up and wondered. We have felt the need to understand the world around us and our place within it...to understand who we are and how to create the best possible life that we can. In the beginning, astronomy and astrology were merged. It wasn't until the 18th century that the lines between astronomy and astrology were formed and they became two distinct disciplines. Astronomy is the scientific study of the universe beyond Earth...the movement of the stars and planets within our solar system. Astrology applies meaning to the relationships between the planets, stars, and us here on Earth.

(Sumerian Tablet ~ circa 4000 B.C.)

At the moment of our birth we are infused with the energies of the cosmos. A natal chart is the map of the heavens, a snapshot so to speak of that moment of our first breath. There is much to discover from the patterns that we find in our birth chart.

Our birth chart is like a special software program that is custom designed to give our soul exactly the quality of experience that it wants to have for this lifetime. This means that we will have challenges, which from our personality's point of view we may not prefer, but from our soul's perspective these challenges are exactly what we need for further growth along the evolutionary path. That being said, we also have free will and can choose how we express and thus experience the various aspects and traits, which are individual to us.

II. Quantum Astrology – S.P.A. *for the SOUL™*

Quantum Astrology is the point where Science, Psychology, and Astronomy merge...and this point is your Soul. This is why I call what I do “S.P.A. *for the Soul™*.” You can go to a spa for your body, so I wanted to offer a service that feeds your soul.

Your soul is the trinity of the quantum field, your mind, and the universe. The quantum field is what science is now proving—that everything is energy, comes from and returns to energy, and is influenced by our consciousness; but we also have our mind—the result of our natural and social environment; and we are all interconnected in this universe—created and affected by specific mathematics and physical laws.

S.P.A. for the Soul™ creates a transformational experience in which my clients are empowered to co-create the best possible life experience, through awareness of the active energies that are present in the birth chart and that are emerging through progressions and transits while partnering with the archetypal principles in order to form an elevated experience and mastery.

We have our charts; our charts do not have us!

ASTROLOGY SIGNS & HOUSES =
Quantum Field "Space" + Gravity + Spin + Sun Location

The signs follow a "Fibonacci series": a series of numbers in which each number is the sum of the two preceding numbers.

The simplest is the series 1, 1, 2, 3, 5, 8, etc.

The signs also follow the "Golden Ratio/Mean" or "Phi" (1.61803398875): two quantities are in the golden ratio if their ratio is the same as the ratio of their sum to the larger of the two quantities

Familiarize yourself with the following tables, because you will need them when you locate your date/s on the reports that follow.

For the sake of time, you could locate your date/s first, write down the symbols listed, and only find those on the tables. It is totally up to you!

3 Planetary Reports

1. Listed below are the planetary transits for the years 2023 and 2024, PT time. Find the date/s in which you are interested, write down the symbols for those dates, and look up the planets, the signs they rule along with their elements & qualities, and the aspects that the planets are making with each other on those dates. All of this information is useful for you to determine what you can expect on those days as far as astronomical energies, or “The Music of the Planets,” as I like to call them.
2. After the planetary transits are the planetary retrogrades (Rx) and when they go direct. A planetary retrograde is when the planet is closer to Earth, and therefore their energetic effects on Earth are more pronounced. These energies can be intense, so they are not the best time to initiate things, especially Mercury Retrogrades when it comes to communications, transportation, and all things electrical...including our brain & nervous system! Venus Retrogrades are not the best times to initiate all things involving love, romance, and beauty. Refer to the planetary table above to understand what each celestial body has dominion over, and the sign/s it rules.

3. After the planetary retrogrades is a list of the Moon Void of Course (V/C) dates. When the Moon first enters a sign, she has a stabilizing effect on Earth. This is also the case when she is in an applying aspect to other planets within the sign, and then at the exact degree of each aspect. After she is separating from her last aspect with a planet in a particular sign, however, she is considered “Void of Course” until she enters the next sign. During this time, we here on Earth can feel a little bit drifty and dreamy, so be aware of that!

All of that being said, how each planet interacts with your birth chart is distinct. Even though there are overall energies and tendencies, each of us was born with a unique birth chart, so we are affected differently than other people. For example, I was born with Mercury Retrograde, so I am more “inoculated” from it than others who weren’t. You can book a reading for a more in-depth look at your birth chart (there are also reports available on my Services page):

Lastly, I would like to reemphasize the Quantum Power that we have. In other words, there are “diagnoses” and “prognoses,” and then there is the power we have as conscious co-creators to influence matter (mind over matter), so it falls on each individual to know where he or she are in the evolution of their own power. My father was given only 6 months to live but lived 9 years longer! You’re probably familiar with The Law of Attraction, Reiki, hands on healing, etc. Metaphysic is my first true love! If not for my dad, I would not have been exposed to astrology 6 years after his prognosis, when he gifted me an astrology reading for my 18th birthday. Astrology is simply a guide like any other tool (e.g. weather forecast, GPS, Feng Shui, etc.).
